The Ontario's Ministry of Transportation, Road User Safety Division, is preparing to post an RFP for vendor services in July. As a first step in a multi-phase Road User Safety Modernization (RUS) Modernization project, the Road User Safety Division intends to post a Request for Proposal in the coming weeks for a vendor to provide solution(s) to meet both Ontario's International Registration Plan and the Oversize/Overweight program requirements. It is anticipated that the RFP will be posted on MERX towards the middle of summer 2011 with a closing date approximately five weeks later. These dates are subject to change.
