Despite the emphasis the tighter budgets agencies face under sequestration, major contract opportunities are continuing to move forward. The sum total for 28 upcoming contracts is \$116.142 billion. Of course, small businesses won't be left out in the cold. Of that total, close to some \$17 billion will for be small businesses awards.

Source: Deltek

Many of Deltek's opportunity analysts have reported that contracting offices have been unable to comment on the precise impact of sequestration their programs. Contractors will want to monitor changes in requirements and scheduling as the precise impact of sequestration becomes clearer.

In some cases, agency officials indicated that sequestration is not expected to have an immediate impact on their contract. Future delays in funding, however, could be a possibility. Certainly, agencies are prioritizing programs, complying with mandates and, in some cases, restructuring their efforts. Program cancellations, however, seem to be in the minority.
